DRIFT-CONTROL SPRAYER
Save time, labor and chemicals.

Environmentally responsible
Thanks to a unique drift-control design, aerodynamically designed shields and fully shielded curtains control chemical spray within the spraying chambers for on-target application. Operators can spray up close to ornamental plants, flower beds, water and other landscape features with confidence. Helps you stay in control of your schedule, even on breezy days.

Highly productive
Enjoy faster application and greater coverage, eliminating the inefficient, time-consuming and fatiguing back-and-forth motion commonly associated with conventional hose sprayers. With the 133-inch spray width, large properties can be completed in record time, all from the comfort of the operator’s seat. And when spraying in confined or obstacle-laden areas, one or both wings can be easily lifted for maximum maneuverability.

Your application production solution
Now you can double or even triple your spray crew’s efficiency with a sprayer attachment for your Grasshopper True ZeroTurn™ mower. This front-mounted drift-control sprayer is the most productive and cost-effective way to apply liquid fertilizers, pesticides and herbicides to turf areas. And since the sprayer mounts close to the drive wheels in place of the deck, you’ll enjoy Grasshopper’s famous maneuverability. Even the 11-foot Bi-Fold model is agile on a FrontMount™ power unit.

Scan this code for instant access to videos, user stories and information about the Drift-Control Sprayer.

“We use a Grasshopper and sprayer on all our athletic fields, and we absolutely love it. There’s no drifting, and all the spray stays where we want it. It’s just great.”

AJ Willis
Lexington Christian Academy, Lexington, KY

Cover more turf with fewer chemicals for consistent, cost-effective spraying

The ProLawn shielded sprayer system applies small droplets that “stick” to the vegetation, achieving greater coverage with fewer chemicals – up to 5.5 acres, or 240,000 square feet, with only one tankful!

You get consistent spray coverage over the entire turf area. Four nozzles in each spraying chamber provide superior uniform coverage. By maintaining a constant ground speed, the amount of chemical being applied can be precisely monitored.

The versatile sprayer design allows use of the 53-inch center section alone and then expanding to the 133-inch width by adding wings. The 53-inch Economizer is not expandable.

Standard features

- E-Z Curtain Rail System
- Shield bumper guard
- Non-corrosive, UV-resistant spray shields
- 35-ounce, tear-resistant side curtains
- Nozzle flow indicators
- Manual pressure regulator
- TeeJet® nozzle assembly with diaphragm check valves and standard 80015 tips, interchangeable
- Line strainer with 100-mesh stainless screen
- Spray tips with 100-mesh stainless screens at 10-inch nozzle spacing
- 12-volt electric diaphragm pump
- On/off electrical switch
- 30-gallon tanks
- Pneumatic turf tires
- Powder-coated paint
- Stainless steel and dichromate-plated hardware
- One-year limited warranty

Always follow local, state and federal spraying regulations and product label instructions when applying chemicals.

Superior performance by design

TeeJet® spray nozzles (four per chamber) with 100-mesh tip screens are easily removed for cleaning or replacement.

A built-in stand makes installation, removal, storage and transport a one-person operation.

Breakaway wings protect the sprayer and small trees from damage caused by accidental contact.

Front-mounted caster wheels and independently floating spray chambers follow ground contours for precise and even spray application.

Nozzle flow indicators let you monitor how each individual nozzle is performing.

TeeJet® valves, pressure regulator and pressure gauge are all within easy reach and sight of the operator.
