360° of Comfort

A full-view WeatherBeater™ winter enclosure provides the operator with protection from winter wind and snow for comfort and productivity. Enter or exit enclosure from either side. Foam-padded QuikAdjust Tilt™ dual levers that fold out of the way for easy access are standard on select models and available for all models. Requires counterweight.

Options for comfort and productivity.

1. **HEATER**
   The 16,000 BTU heater (PN 503270), available for liquid-cooled models, mounts near the top of the winter enclosure for improved heat circulation. QuikCoupler™ option speeds plug-in of the heater.

2. **LIGHTS**
   Work in inclement weather with halogen (PN 503340) or bright LED (PN 503328) headlights that last far longer than conventional bulbs.

3. **BEACON LIGHT**
   Increase visibility for motorists and pedestrians when clearing snow from high-traffic areas (PN 503327).

4. **WINDSHIELD WIPER**
   Manual wiper standard. Optional electric wiper kit (PN 503951) available.

5. **PERFORMANCE PACKAGE**
   Steering lever-mounted joystick allows operator to lift and angle dozer blades and rotary brooms, as well as lift the snowthrower and rotate the snowthrower spout, without letting go of the control levers. Provides simultaneous on-the-go implement adjustments and zero-turn maneuvering for continuous, efficient operation.

6. **FRONT PANEL KITS**
   Front Panel Kit: A Front Panel Kit must be selected when ordering a Winter Enclosure. Choose from the following front panel kit options:
   - Fixed-angle rotary brooms front panel kit (PN 503601)
   - Manual lift and manual angle dozer blades front panel kit (PN 503602)
   - Metal with clear acrylic glass and floor mat front panel kit for joystick-controlled implements (PN 503603)
   - Vinyl front panel kit for manual snowthrowers and Pro model dozer blades (PN 503604)

Winter enclosure shown with optional lights, heater and joystick control.
Winter enclosure is not designed for mowing or turf care applications.

Save time, labor and money with professional-grade implements.

Clear sidewalks and driveways with no wasted motion, and move in and out of tight spaces quickly and easily with Grasshopper True ZeroTurn™ FrontMount™ snow removal implements. Designed for long-lasting durability, these compact, heavy-duty implements deliver superior performance season after season. And with only one engine to maintain, you’ll replace a truckload of single-purpose, stand-alone equipment, saving you valuable time and money.

To request implement specifications or see implements in action, visit grasshoppermower.com/implements.
SNOW REMOVAL IMPLEMENTS

**DRIFTBUSTER™ SNOWTHROWERS**

PTO-driven snowthrowers make a clean pass and propel snow up to 30 feet. Spout rotates a full 180 degrees for precise placement of cleared snow. Forward and reverse action makes short work of large drifts.

**Choose one of four control kits:**
- Manual spout rotation and manual lift (PN 503642)
- Manual spout rotation and electric lift (600 Series PN 503643, 700/900 Series PN 503644)
- Electric Spout rotation and manual lift (600/700/900 Series PN 503642 + 503645)
- Snow Performance Package – electric spout rotation and electric lift with lever-mounted joystick control (600 Series PN 503646, 700/900 Series PN 503647)

**Cleansweep™ Rotary Brooms**

PTO-driven rotary brooms sweep dirt and debris, and clean up to 8 inches of snow. Fixed-angle models sweep at a 25-degree angle to the right.

Optional stand kit (PN 503306) for models without gauge wheels (PN 503282) and optional jack kit (PN 503303) for fixed-angle brooms speed the QuickConverter™ mounting process.

The 60-inch bidirectional model can be adjusted hydraulically from the operator’s seat 25 degrees left or right and raised electrically up to 2 inches with the optional Snow Performance Package with lever-mounted joystick control (PN 504800).

**“We use the rotary brooms in the winter to clear the sidewalks and driveways for the resort’s guests. They work great – even in wet snow.”**

**HOLLY MAJONE**
General Manager, Graycliff Cypressed Resort, Nashville, TN

**Little Bully™ Dozer Blade**

Multipurpose dozer blades offer unbelievable performance moving dirt, sand, gravel and snow. Blades operate straight ahead or 25 degrees left or right, and can be raised and lowered with hand and foot controls for easy operation, responsive control and timesaving efficiency.

Three upgrade packages available:
- Footcontrolled angling kit (PN 503674) for standard Little Bully™ blades
- Pro model blade with foot pedal lift and hydraulic angling
- PowerBlade™ with Snow Performance Package hydraulic lift and angling with lever-mounted joystick control

**“The dozer blades are great for snow removal. They definitely save us man-hours while reducing fuel consumption and overall emissions.”**

**KEVIN SMITH**
Grounds Manager, Maize USD 266, Maize, KS

**“We have several sites with several miles of walks and the V-plow has proven to be by far the fastest method of clearing them.”**

**BRIAN FRASER**
Greenbrook Landscaping & Maintenance Co., Farmington Hills, MI

**Little Bully™ V-Plow**

The 60-inch V-plow pushes through heavy snowdrifts effortlessly and pushes snow to both sides of the skid steer opening up sidewalks and driveways in one pass. True ZeroTurn™ maneuverability allows 180-degree turns within the cleared path without unloading snow to reduce packing while negotiating turns. The weight of the V-plow is transferred to the drive tires for optimal traction and control for clearing large amounts of snow in a short period of time.

**Get a Grip on Slippery Surfaces**

Mounting a snow removal implement to a FrontMount™ Grasshopper applies the weight of the implement to the drive wheels for superior traction and maneuverability in wintry conditions, unlike attaching a snow removal option to a mid-mount tractor, which takes weight off of the drive wheels and decreases traction.

**Bar Tread Tires**

Bar tread tires flex with the terrain to provide excellent traction in snow. In areas where ice is common, operators may choose to switch to turf tires and chains.

**Turf Tires with Chains**

In areas where ice is common, turf tires with tire chains provide enhanced traction and handling. Tire chains are available for 20-inch turf tires only.
